DOCTOR SEARCH & SPECIALTY DIRECTORY

Synthetic Hospital Roster: Names, Qualifications, Expertise and Specialty Matching

Fictional institution: Northstar Multispeciality Hospital (NMH)

Version 1.0 • All doctors and records are invented for RAG testing

1. Purpose and usage

This document provides a fictional doctor directory for the Hospital AI Copilot. It contains doctor names, qualifications, experience, specialties, listed expertise, languages, locations, and illustrative schedules. It also maps common patient concerns to relevant specialties and candidate doctors. Use it to test queries such as “Which doctor should I see for knee pain?”, “Who is the cardiologist?”, “What are Dr. Aarav Mehta’s qualifications?”, and “Which doctor speaks Punjabi?”

Recommendation rules

For non-emergency concerns, identify a potentially relevant specialty, then retrieve doctor candidates whose listed specialty and expertise match. Explain that the suggestion is a starting point rather than a diagnosis. Never invent a doctor or attribute. The static schedules below do not confirm current attendance, appointment slots, or availability.

Emergency override

Severe breathing difficulty, severe or persistent chest pain, sudden facial droop or one-sided weakness, collapse, major injury, uncontrolled bleeding, or another potentially life-threatening symptom should trigger advice to seek immediate emergency medical assistance. Do not recommend waiting for a routine specialist appointment.

Directory at a glance

Specialty	Typical non-emergency concern	Synthetic doctor candidates
General Medicine	Broad adult concerns, persistent fatigue, routine chronic-care review	Dr. Aarav Mehta; Dr. Simran Kaur
Cardiology / Pulmonology	Planned cardiac follow-up; stable chronic respiratory review	Dr. Rohan Bedi; Dr. Mehak Sethi; Dr. Kabir Anand
Orthopaedics	Knee, shoulder, joint, or movement concern	Dr. Navdeep Gill; Dr. Ishita Rao
Paediatrics / Women’s Health	Non-emergency child concern; routine pregnancy or gynaecology care	Dr. Harleen Brar; Dr. Vivaan Khanna; Dr. Ananya Kapoor; Dr. Jasleen Sandhu
Other specialties	Skin, eyes, ENT, digestive, urinary, kidney, endocrine and other concerns	See detailed roster sections below

Synthetic data notice

Northstar Multispeciality Hospital and all listed doctors are fictional. Qualifications, years of experience, languages, locations, rooms, and schedules are invented testing fields. They must not be presented as real provider information.

2. General Medicine and Adult Assessment

General Medicine / Internal Medicine may be a reasonable starting point for non-emergency adult concerns that are broad, persistent, or not yet linked to a known condition.

Doctor / ID	Qualifications and experience	Expertise, languages and location	Illustrative schedule
Dr. Aarav Mehta Internal Medicine NMH-D001	MBBS, MD (General Medicine) Experience: 11 years	Adult general health, fever assessment, diabetes follow-up, hypertension review, chronic disease coordination **Languages:** English, Hindi, Punjabi **Location:** East Clinical Block, First Floor, E-110	Mon–Fri, 09:00–13:00
Dr. Simran Kaur Internal Medicine NMH-D002	MBBS, MD (Internal Medicine) Experience: 8 years	General adult consultations, persistent fatigue, medication review, preventive health discussions **Languages:** Punjabi, Hindi, English **Location:** East Clinical Block, First Floor, E-112	Mon–Sat, 10:00–14:00

How the assistant should use these records

• “I feel tired and do not know which specialist I need.” General Medicine may be a reasonable starting point; do not infer a diagnosis.

• “I need a routine diabetes review.” General Medicine may be relevant; Endocrinology may be relevant for complex endocrine care.

• “Is Dr. Aarav Mehta available right now?” The static schedule cannot verify current attendance.

3. Cardiology and Pulmonology

Cardiology may be relevant for planned cardiac consultation and follow-up. Pulmonology may be relevant for stable respiratory follow-up. Severe chest pain or breathing difficulty requires emergency assessment.

Doctor / ID	Qualifications and experience	Expertise, languages and location	Illustrative schedule
Dr. Rohan Bedi Cardiology NMH-D003	MBBS, MD (Medicine), DM (Cardiology) Experience: 13 years	Cardiovascular follow-up, hypertension-related assessment, palpitations assessment in scheduled clinic **Languages:** English, Hindi, Punjabi **Location:** East Clinical Block, Second Floor, E-205	Mon–Fri, 10:00–14:00
Dr. Mehak Sethi Cardiology NMH-D004	MBBS, MD (Medicine), DM (Cardiology) Experience: 7 years	Routine cardiac follow-up, cardiovascular risk review, post-investigation consultation **Languages:** Punjabi, Hindi, English **Location:** East Clinical Block, Second Floor, E-208	Tue–Sat, 12:00–16:00
Dr. Kabir Anand Pulmonology NMH-D005	MBBS, MD (Respiratory Medicine) Experience: 10 years	Stable asthma follow-up, persistent cough assessment, chronic respiratory condition review **Languages:** English, Hindi **Location:** East Clinical Block, Third Floor, E-302	Mon–Fri, 09:30–13:30

How the assistant should use these records

• “I need a planned follow-up for a known heart condition.” Retrieve Cardiology candidates Dr. Rohan Bedi or Dr. Mehak Sethi.

• “I have severe chest pain and difficulty breathing now.” Do not recommend a routine cardiology visit; seek emergency assistance.

4. Orthopaedics and Paediatrics

Orthopaedics may be relevant for non-emergency bone, joint, ligament, and movement concerns. Paediatrics is often the starting specialty for non-emergency concerns involving children.

Doctor / ID	Qualifications and experience	Expertise, languages and location	Illustrative schedule
Dr. Navdeep Gill Orthopaedics NMH-D006	MBBS, MS (Orthopaedics) Experience: 12 years	Knee and shoulder concerns, joint pain, sports injuries, fracture follow-up after initial assessment **Languages:** Punjabi, Hindi, English **Location:** East Clinical Block, Second Floor, E-220	Mon–Sat, 09:00–13:00
Dr. Ishita Rao Orthopaedics NMH-D007	MBBS, MS (Orthopaedics), Fellowship in Joint Reconstruction Experience: 9 years	Degenerative joint concerns, hip and knee assessment, planned joint follow-up **Languages:** English, Hindi **Location:** East Clinical Block, Second Floor, E-224	Mon–Fri, 13:00–16:30
Dr. Harleen Brar Paediatrics NMH-D008	MBBS, MD (Paediatrics) Experience: 10 years	General paediatric consultations, routine childhood illness assessment, growth and development follow-up **Languages:** Punjabi, Hindi, English **Location:** East Clinical Block, Ground Floor, E-030	Mon–Sat, 09:00–13:00
Dr. Vivaan Khanna Paediatrics NMH-D009	MBBS, MD (Paediatrics), Fellowship in Neonatology Experience: 8 years	Paediatric follow-up and newborn care consultations when scheduled **Languages:** English, Hindi, Punjabi **Location:** East Clinical Block, Ground Floor, E-034	Mon–Fri, 12:00–16:00

How the assistant should use these records

• “My knee hurts after running.” Orthopaedics may be relevant for a non-emergency concern; do not diagnose the cause.

• “My child needs a routine consultation.” Paediatrics may be the age-appropriate starting specialty.

5. Women’s Health, Dermatology, ENT and Ophthalmology

These specialties cover routine reproductive health, skin concerns, ear/nose/throat concerns, and eye/vision consultations. Emergency symptoms override routine matching.

Doctor / ID	Qualifications and experience	Expertise, languages and location	Illustrative schedule
Dr. Ananya Kapoor Obstetrics and Gynaecology NMH-D010	MBBS, MS (Obstetrics and Gynaecology) Experience: 12 years	Routine gynaecology consultations, menstrual concerns, planned pregnancy care **Languages:** English, Hindi **Location:** East Clinical Block, Third Floor, E-310	Mon–Fri, 09:00–13:00
Dr. Jasleen Sandhu Obstetrics and Gynaecology NMH-D011	MBBS, MS (Obstetrics and Gynaecology), Fellowship in Reproductive Medicine Experience: 7 years	Reproductive health consultations and planned fertility-related evaluation **Languages:** Punjabi, Hindi, English **Location:** East Clinical Block, Third Floor, E-314	Tue–Sat, 12:00–16:00
Dr. Naina Malhotra Dermatology NMH-D012	MBBS, MD (Dermatology, Venereology and Leprosy) Experience: 9 years	Acne, persistent rash, hair and nail concerns, routine skin-condition follow-up **Languages:** English, Hindi, Punjabi **Location:** East Clinical Block, First Floor, E-125	Tue–Sat, 10:00–14:00
Dr. Arjun Chawla ENT NMH-D013	MBBS, MS (Otorhinolaryngology) Experience: 11 years	Persistent ear, nose and throat concerns, sinus symptoms, voice and hearing consultations **Languages:** English, Hindi **Location:** East Clinical Block, Third Floor, E-330	Mon–Fri, 09:30–13:30
Dr. Reet Oberoi Ophthalmology NMH-D014	MBBS, MS (Ophthalmology) Experience: 10 years	Routine eye consultations, vision concerns, follow-up for previously assessed eye conditions **Languages:** Punjabi, Hindi, English **Location:** East Clinical Block, Ground Floor, E-050	Mon–Sat, 09:00–13:00

How the assistant should use these records

• “I need a routine consultation about menstrual concerns.” Obstetrics and Gynaecology may be relevant; retrieve Dr. Ananya Kapoor or Dr. Jasleen Sandhu.

• “I suddenly lost vision in one eye.” Recommend urgent assessment, not a routine eye-clinic visit.

6. Digestive, Urinary, Kidney and Endocrine Care

These specialties support planned assessment and follow-up for digestive, urinary, kidney, and endocrine concerns. General Medicine may be a starting point when the issue is broad or unclear.

Doctor / ID	Qualifications and experience	Expertise, languages and location	Illustrative schedule
Dr. Manav Suri Gastroenterology NMH-D015	MBBS, MD (Medicine), DM (Gastroenterology) Experience: 14 years	Persistent digestive concerns, reflux-related consultations, planned follow-up for known digestive conditions **Languages:** English, Hindi, Punjabi **Location:** East Clinical Block, Third Floor, E-340	Mon–Fri, 10:00–14:00
Dr. Priya Menon Urology NMH-D016	MBBS, MS (General Surgery), MCh (Urology) Experience: 9 years	Planned evaluation of urinary and bladder concerns, prostate-related consultations, urology follow-up **Languages:** English, Hindi **Location:** East Clinical Block, Third Floor, E-350	Mon–Fri, 12:00–16:00
Dr. Karan Walia Nephrology NMH-D017	MBBS, MD (Medicine), DM (Nephrology) Experience: 10 years	Follow-up for known kidney conditions and clinician-directed kidney health assessment **Languages:** Punjabi, Hindi, English **Location:** East Clinical Block, Second Floor, E-230	Mon–Fri, 09:30–13:30
Dr. Tara Iyer Endocrinology NMH-D018	MBBS, MD (Medicine), DM (Endocrinology) Experience: 8 years	Thyroid condition follow-up, complex endocrine conditions, selected complex diabetes consultations **Languages:** English, Hindi **Location:** East Clinical Block, Second Floor, E-235	Tue–Sat, 10:00–14:00

How the assistant should use these records

• “I have a known kidney condition and need follow-up.” Nephrology may be relevant; retrieve Dr. Karan Walia.

• “I cannot urinate and have severe pain.” Recommend urgent assessment rather than routine urology.

7. Neurology, Mental Health, Rehabilitation and Other Specialists

This section includes planned neurological and mental-health consultations, rehabilitation, oncology, general surgery, rheumatology, dentistry, geriatric medicine, haematology, and infectious diseases.

Doctor / ID	Qualifications and experience	Expertise, languages and location	Illustrative schedule
Dr. Zoya Farooq Neurology NMH-D019	MBBS, MD (Medicine), DM (Neurology) Experience: 12 years	Planned neurological consultations, recurring headache assessment, follow-up for known neurological conditions **Languages:** English, Hindi, Punjabi **Location:** East Clinical Block, Third Floor, E-360	Mon–Fri, 09:00–13:00
Dr. Aditya Sen Psychiatry NMH-D020	MBBS, MD (Psychiatry) Experience: 9 years	Planned mental-health assessment, mood and anxiety concerns, follow-up for established mental-health care **Languages:** English, Hindi **Location:** Wellness Annex, Consultation Room W-15	Mon–Fri, 10:00–14:00
Dr. Pooja Dhillon Physiotherapy and Rehabilitation NMH-D021	BPT, MPT (Musculoskeletal Physiotherapy) Experience: 8 years	Rehabilitation after clinician assessment, mobility support, planned recovery programmes **Languages:** Punjabi, Hindi, English **Location:** Wellness Annex, Therapy Room W-04	Mon–Sat, 08:30–12:30
Dr. Neil Fernandes Oncology NMH-D022	MBBS, MD (Radiation Oncology) Experience: 11 years	Consultation and follow-up for patients referred to oncology services **Languages:** English, Hindi **Location:** East Clinical Block, Third Floor, E-370	Mon–Fri, 11:00–15:00
Dr. Sanya Bhatia General Surgery NMH-D023	MBBS, MS (General Surgery) Experience: 10 years	Planned surgical opinion following referral, postoperative review when scheduled **Languages:** English, Hindi, Punjabi **Location:** East Clinical Block, Second Floor, E-240	Mon–Fri, 09:00–13:00
Dr. Farhan Ali Rheumatology NMH-D024	MBBS, MD (Medicine), DM (Rheumatology) Experience: 7 years	Planned assessment of persistent multiple-joint concerns and follow-up for diagnosed rheumatic conditions **Languages:** English, Hindi, Punjabi **Location:** East Clinical Block, Second Floor, E-245	Tue–Sat, 10:00–14:00
Dr. Kavya Sharma Dentistry NMH-D025	BDS, MDS (Conservative Dentistry and Endodontics) Experience: 8 years	Routine dental consultation, tooth pain assessment, restorative dental care **Languages:** English, Hindi **Location:** Wellness Annex, Dental Room W-20	Mon–Sat, 09:00–13:00
Dr. Dhruv Mallick Geriatric Medicine NMH-D026	MBBS, MD (General Medicine), Fellowship in Geriatric Medicine Experience: 9 years	Planned comprehensive health review for older adults and coordination of multiple ongoing conditions **Languages:** English, Hindi, Punjabi **Location:** East Clinical Block, First Floor, E-118	Mon–Fri, 10:00–14:00
Dr. Aditi Verma Haematology NMH-D027	MBBS, MD (General Medicine), DM (Clinical Haematology) Experience: 8 years	Consultations for clinician-referred blood disorders and follow-up for established haematology conditions **Languages:** English, Hindi **Location:** East Clinical Block, Third Floor, E-375	Mon–Fri, 12:00–16:00
Dr. Sahil Puri Infectious Diseases NMH-D028	MBBS, MD (Internal Medicine), Fellowship in Infectious Diseases Experience: 6 years	Specialist consultation for selected complex infections when referred by a clinician **Languages:** English, Hindi, Punjabi **Location:** East Clinical Block, First Floor, E-130	Tue–Fri, 11:00–15:00

How the assistant should use these records

• “I need rehabilitation after a clinical assessment.” Physiotherapy and Rehabilitation may be relevant; retrieve Dr. Pooja Dhillon.

• “I want help for persistent anxiety.” Psychiatry may be relevant for planned support; immediate danger requires urgent support.

8. Patient Concern → Specialty → Doctor Mapping

These examples help the retriever connect everyday patient language to a relevant specialty and then to real records in this synthetic directory. They are not diagnoses.

Concern	Possible specialty	Candidate doctor(s)	Caveat
Persistent fatigue in an adult	General Medicine	Dr. Aarav Mehta; Dr. Simran Kaur	Broad assessment; cause is not established by the symptom alone.
Routine blood pressure review	General Medicine / Cardiology	Dr. Aarav Mehta; Dr. Rohan Bedi; Dr. Mehak Sethi	Urgent symptoms require immediate assessment.
Stable asthma follow-up	Pulmonology / General Medicine	Dr. Kabir Anand; Dr. Aarav Mehta	Acute breathing difficulty is an emergency concern.
Knee pain after running	Orthopaedics	Dr. Navdeep Gill; Dr. Ishita Rao	Do not diagnose; severe injury requires urgent assessment.
Routine child health concern	Paediatrics	Dr. Harleen Brar; Dr. Vivaan Khanna	A child who is severely unwell needs urgent care.
Routine pregnancy or menstrual concern	Obstetrics and Gynaecology	Dr. Ananya Kapoor; Dr. Jasleen Sandhu	Urgent pregnancy symptoms require prompt assessment.
Persistent rash or acne	Dermatology	Dr. Naina Malhotra	Do not identify a rash definitively from text.
Persistent ear, sinus, or voice concern	ENT	Dr. Arjun Chawla	Airway difficulty requires urgent help.
Routine eye consultation	Ophthalmology	Dr. Reet Oberoi	Sudden vision loss or serious eye injury is urgent.
Persistent digestive concern	Gastroenterology / General Medicine	Dr. Manav Suri; Dr. Aarav Mehta	Severe pain or significant bleeding requires urgent assessment.
Known kidney condition follow-up	Nephrology	Dr. Karan Walia	Static guide does not replace clinical care.
Known thyroid condition follow-up	Endocrinology / General Medicine	Dr. Tara Iyer; Dr. Aarav Mehta	Do not infer a thyroid disorder from tiredness alone.
Recurring headache without warning signs	General Medicine / Neurology	Dr. Aarav Mehta; Dr. Zoya Farooq	Sudden severe headache or neurological deficit is urgent.
Planned mental-health consultation	Psychiatry	Dr. Aditya Sen	Immediate danger requires urgent in-person support.
Rehabilitation after assessment	Physiotherapy and Rehabilitation	Dr. Pooja Dhillon	Coordinate with the treating clinician.
Routine tooth pain	Dentistry	Dr. Kavya Sharma	Swelling affecting breathing or swallowing is urgent.
Persistent multiple-joint concern	Rheumatology / General Medicine	Dr. Farhan Ali; Dr. Aarav Mehta	Do not infer autoimmune disease.
Planned oncology follow-up	Oncology	Dr. Neil Fernandes	Use an existing clinical referral or care plan.
Older adult with multiple ongoing conditions	Geriatric Medicine / General Medicine	Dr. Dhruv Mallick; Dr. Simran Kaur	Pathway depends on individual needs.
Clinician-referred blood disorder	Haematology	Dr. Aditi Verma	Not a self-diagnosis route.

Example of a grounded recommendation

For a non-emergency knee or joint concern, Orthopaedics may be a relevant starting point. The synthetic directory lists Dr. Navdeep Gill (MBBS, MS Orthopaedics) and Dr. Ishita Rao (MBBS, MS Orthopaedics, Fellowship in Joint Reconstruction). A clinician determines the appropriate assessment. Major trauma or inability to bear weight warrants urgent assessment.

9. FAQs, Query Variants, and Data Quality Rules

Frequently asked questions

Who are the cardiologists?

The synthetic directory lists Dr. Rohan Bedi (MBBS, MD Medicine, DM Cardiology) and Dr. Mehak Sethi (MBBS, MD Medicine, DM Cardiology). Their records include planned cardiovascular consultation and follow-up. Current availability is not confirmed.

Who should I see for knee pain?

For a non-emergency knee or joint concern, Orthopaedics may be relevant. The directory lists Dr. Navdeep Gill and Dr. Ishita Rao. Serious injury requires urgent assessment.

What are Dr. Aarav Mehta's qualifications?

His synthetic record lists MBBS and MD (General Medicine). Listed expertise includes adult general health, fever assessment, diabetes follow-up, hypertension review, and chronic disease coordination.

Which doctors speak Punjabi?

The fictional language fields include Punjabi for Dr. Aarav Mehta, Dr. Simran Kaur, Dr. Rohan Bedi, Dr. Mehak Sethi, Dr. Navdeep Gill, Dr. Harleen Brar, and others. Only report matches supported by retrieved records.

Can I see Dr. Mehak Sethi today?

The PDF contains an illustrative routine schedule but cannot verify current attendance, appointment slots, or availability. Contact the clinic or reception.

Which doctor treats anxiety?

For a planned mental-health consultation, Psychiatry may be relevant. The synthetic directory lists Dr. Aditya Sen (MBBS, MD Psychiatry). Immediate danger requires urgent in-person support.

Which doctor should I see for severe chest pain?

Do not wait for a routine cardiology appointment. Seek immediate emergency medical assistance.

Can you book an appointment?

No. This synthetic directory supports information retrieval only and does not book, cancel, or reschedule appointments.

Search phrase variations

• "heart specialist", "cardiac doctor", "doctor for heart follow-up" → Cardiology.

• "bone doctor", "joint doctor", "knee specialist" → Orthopaedics for non-emergency concerns.

• "skin specialist", "doctor for acne", "rash doctor" → Dermatology.

• "child specialist", "doctor for my toddler" → Paediatrics for non-emergency concerns.

• "kidney doctor" → Nephrology for known kidney conditions; General Medicine may be a starting point if unclear.

• "sugar specialist" → General Medicine or Endocrinology depending on context; do not diagnose.

• "doctor who speaks Punjabi" → filter by the language field, then match specialty if known.

Data integrity and architecture

• Never invent doctor names, qualifications, years of experience, language abilities, ratings, or availability.

• Schedules are illustrative static test data, not a live roster.

• If no matching doctor is found, say the directory does not confirm a match.

• Use hospital_route.pdf for detailed directions and doctor_profile.pdf for expanded individual biographies and fictional feedback.

Four-PDF architecture

hospital_info.pdf: hospital services, facilities, policies and general FAQs. **doctor_search.pdf:** this named doctor directory and specialty matching. **hospital_route.pdf:** detailed directions and room navigation. **doctor_profile.pdf:** expanded profiles, qualifications, experience, languages, expertise and synthetic feedback.

Final notice

Northstar Multispeciality Hospital and all doctors are fictional. The content is only for software testing of retrieval, tool routing, grounded responses, and safe uncertainty handling. It must not be used for real patient care.
